Experience in the treatment of 20 patients is reported.
Twelve of these patients had previously been treated
(with sulfone), to which most had been intolerant. A
daily dosing schedule of starting was increased by 500 mg
each week to a maximum dose in some cases of 3 g.
Tolerance was good. The patient's not previously
treated showed test results (flattening and absorption of
the lymphatic, regression of infiltration of plagues,
regression of ulcer). Case histories are included.
